

New PV Technologies Require Exploration of Safety Risks

Crystal Vanderpan, Underwriters Labs

Heike Thomas, Underwriters Labs

Learn more about Underwriters Laboratories' (R) latest involvement within the Photovoltaic industry. New technologies require the exploration of potential safety risks, gain insight to the current status of the development of new requirements, specifically related to PV materials. Learn also more about the deviations between UL and the international requirements as well as an update on the harmonization progress of the respective standards. Get answers to your questions in a subsequent Q& A session.
